

## MAKING A DIFFERENCE IN EDUCATION

*For 45 Years*

In 1978, Claudia Anderson founded Audio Enhancement® to find a solution for her hearing-impaired son's ability to participate in a general classroom. She was told, her sons would never succeed, and she said, "Oh, yes, they will!"

She designed a sound system for their classrooms as an effort to help her own children and quickly realized the impact it had on all teachers and students.

45 years later, Audio Enhancement has continued to develop industry-leading products. From classroom sound fields, to intercom bells and paging, to integrating with existing safety infrastructures, we are passionate about equity and ensuring all children have the same opportunity to learn in a safe environment.

The partnership between Audio Enhancement and NJASA (New Jersey Association of School Administrators) is one of shared beliefs, goals, and passion. Let us help you streamline your classroom's learning resources, eliminate tech issues, and maximize your effectiveness so you can focus on what matters most—your students' success. We're excited to show you how our innovative systems and simple technology can make your professional life easier.

*We're excited to be in New Jersey!*
